

Aerospace Museum

Foxes and Deer went on a trip to Aerospace Bristol this week, as part of their topic all about flight. They had a brilliant day out and even had the chance to make their own paper aeroplanes!

Year 2

In Science this week, Foxes and Deer have had great fun making their own parachutes. They also tested which material made the best parachute.

Year of Adventure

Falcons & Hedgehogs worked together in groups to carry out a science experiment, making "moon sand". They talked about solids and liquids and looked at how the flour and baby oil changed, when mixed together.
